Muhammed Taha Metin

Software Engineer

Istanbul, Türkiye · +90 543 516 42 54 · tahametin341@gmail.com · linkedin.com/in/taha-metin · github.com/TahaMetin

PROFESSIONAL SUMMARY

Software Engineer with **fintech experience** at **Softtech**, developing and maintaining **backend services** for banking systems. Skilled in **Java**, **Spring Boot**, **microservices**, **REST** and **SOAP** APIs, **webMethods** integration, **Oracle DB** and **ETL** with **IBM DataStage**. Contributed to the **Java 21 migration** infrastructure work, delivered **new features** and **bug fixes**, resolved **incident records**, and improved code quality through **SonarQube** findings and higher **test coverage** using **AI-assisted development**.

TECHNICAL SKILLS

- **Programming Languages:** Java (8, 17, 21), C#, SQL, Python, JavaScript
- **Frameworks & Build Tools:** Spring Boot, Maven, Gradle
- **Architecture & Design:** Microservices, OOP, SOLID principles, design patterns
- **APIs & Integration:** REST, SOAP, webMethods (Software AG) flow services, service development, API integration
- **Databases & ETL:** Oracle Database, MongoDB, IBM DataStage, ETL development, data migration
- **Testing & Code Quality:** Unit testing, test coverage, SonarQube, code review
- **DevOps & Workflow:** Git, GitHub, ScoreTFS, CI/CD pipelines, XL Release, Jira, Trello, Agile/Scrum
- **AI-Assisted Development:** OpenCode, DeepSeek, GLM, Claude
- **Spoken Languages:** Turkish (Native), English (B2 iTEP)

PROFESSIONAL EXPERIENCE

Software Engineer — Softtech, Istanbul, Türkiye *Aug 2024 – Oct 2026*

- Developed and maintained **Java** and **Spring Boot microservices** for banking and financial products, exposing them through **REST** and **SOAP APIs**.
- Built **webMethods (Software AG) flow services** that consume data from new services and route it to Java backend services for persistence in **Oracle DB** or processing by the **decision engine**.
- Contributed to the **Java 21 migration** infrastructure work, migrating multiple microservices from **Java 8/17 to Java 21** with **Spring Boot** upgrades and **Maven/Gradle** dependency updates.
- Developed **IBM DataStage ETL** jobs to migrate customer data from bank databases to Softtech **Oracle** databases.
- Added **new features** end to end, delivered **bug fixes** and resolved production defects and **incident records** within agreed timelines.
- Wrote **unit tests** to increase **test coverage** and resolved **SonarQube** findings to improve **code quality** and maintainability.
- Used **AI-assisted development** with in-house tools (**OpenCode** integrated with **DeepSeek** and **GLM** models) to speed up coding, test writing and debugging.
- Worked in **Agile** teams using **Jira** for planning, **ScoreTFS** for **Git** version control and **CI/CD** pipelines, and **XL Release** for release orchestration.

Game Developer Intern — NoSurrender, Istanbul, Türkiye *Jun 2022 – Aug 2022*

- Developed features for a real-time mobile strategy game in **Unity** and **C#**, applying **SOLID principles** and **design patterns**.
- Worked with Addressables, ScriptableObjects, localization and **Photon Bolt** networking; collaborated through **GitHub** and Trello.

EARLIER EXPERIENCE

Game Developer — KOU IEEE Computer Society Game Dev Team, Kocaeli *Aug 2020 – Feb 2022*

- Built a top-down shooter and an idle mobile game in **Unity** and **C#** in a team of 6, implementing **enemy AI** and **pathfinding**.

EDUCATION

B.Sc. in Computer Engineering — Kocaeli University, Kocaeli · GPA 3.02 *2019 – 2024*

- Coursework: **data structures**, **algorithms**, **databases**, **multithreading**, **artificial intelligence**. Graduation project: Myo armband–controlled game for physiotherapy (Natural Human-Computer Interaction Lab).
